

## Application Enabler

### Goal

To provide knowledge of how to configure Application Enabler to index and retrieve documents from Windows-based application, text screens, and HTML pages.

### Course Description

Students connect to Hyland Software's virtual classroom to install, distribute and configure Application Enabler. Students learn how to configure Application Enabler to retrieve documents, folders, and custom queries as well as index documents, create barcodes and generate E-Forms. Students learn to install and configure Disconnected Scanning and experience hands-on scanning, indexing and uploading of batches.

### Topics Covered

- Application Enabler Configuration
- Deployment and Installation
- Disconnected Scanning Configuration and Uploading

### Certifications

This course does not fulfill the requirements for any certification.

### Measurement

Students are expected to configure Application Enabler to retrieve documents.

### Prerequisites

- ▶ **For OnBase System Administrators:** System Administration course
- ▶ **For OnBase Partners:** Introduction to Installation

## Course Agenda

All topics are subject to change and may not appear in the order indicated here.

### Day 1

- Windows-based Applications
- Retrieval
- Indexing
- Bar codes
- E-Form Creation
- Custom Queries

### Day 2

- Text-based Applications
- HTML-based Applications
- ClickOnce Deployment
- Manual Deployment
- Disconnected Scanning
